SKILLS

• Languages:	C++, JavaScript, Python, PHP, HTML, CSS
• Frameworks:	React, Node.js (Express), Laravel, Bootstrap
• Tools/Platforms:	MongoDB, MySQL, Postman
• Soft Skills:	Active Listener, Problem Solver, Team Player, Adaptable

PROJECTS

Eat Healthy	Nov'25
• Built a responsive “Eat Healthy” website using HTML, CSS, and JavaScript with a clean and user-friendly layout. • Implemented an interactive diet-plan feature that suggests healthy meal options based on user input. • Achieved improved usability and engagement by adding dynamic UI elements, optimizing page navigation, and enhancing overall user flow for a smoother browsing experience. • Designed a dynamic diet-plan generator using JavaScript that provides personalized meal suggestions based on user inputs.	
Mental Health Management using C++ Application	Jul'25
• Designed a privacy-centric mental health tracking application by utilizing C++17 and wx Widgets. • Implemented core wellness features such as Mood Tracker, Breathing Exercises, and Gratitude Journal. • Designed the system using the MVC architecture with efficient in-memory data handling using std::vector. • Executed manual and integration testing with Valgrind and Visual Studio Debugger to ensure memory safety and reliability.	
Sentimental Analysis	Set'25
• Designed and developed a Python-based sentiment analysis model with an interactive HTML/CSS/JS front-end for real-time text evaluation. • Implemented AI-inspired classification methods to detect positive, negative, and neutral sentiments, improving accuracy through refined preprocessing. • Achieved smoother performance and clearer outputs by optimizing the back-end pipeline and enhancing the overall user experience. • Integrated real-time visualization of sentiment results using charts and graphs to improve interpretability and user engagement.	

TRAINING

DSA using Java Programming Cipher Schools:	Jun'25–Aug'24
• Completed training in Data Structures and Algorithms using Java, strengthening problem-solving and algorithm application. • Applied core DSA concepts by implementing and testing fundamental structures and algorithms. • Enhanced understanding of Java backend architecture, focusing on server-client communication, session management, and data handling.	

CERTIFICATES

• Data Structure and Algorithms Nxtwave	Oct'25
• HTML, CSS, JavaScript Nxtwave	Aug'25
• Python for AI/ML (CSE Pathashala)	Feb'24
• C++ CSE Patashala	Sep'24

ACHIEVEMENTS

• Mastered algorithmic thinking by completing 200+ C programming challenges on platforms like Neocolab, reinforcing logical reasoning and code optimization skills as part of course work. LPU	Mar'23
--	--------

EDUCATION

• Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering</i>	Punjab, India Aug' 23-Present
• Sri Chaitanya Junior College <i>Intermediate; Percentage: 90%</i>	Vijayawada, AP Apr'21 – Mar'23
• KKR Gowtham High School <i>Matriculation; Percentage: 100%</i>	Vijayawada, AP Apr'20 – Mar'21
